## AAC Ling Two-Row Barley

Pending

### Description

Two-row spring feed barley with good lodging resistance. Excellent yielding in Quebec and the Maritimes. Under evaluation in northern and eastern Ontario for yield performance

### Strengths

- High seed weight
- Better lodging resistance than check varieties

### Management

- Plant seed uniformly treated with an effective fungicide for control of loose smut

### Breeders

R. Khanal<sup>1</sup>, T.M. Choo<sup>2</sup> and R. A. Martin<sup>2</sup>

<sup>1</sup> Ottawa Research and Development Centre, Agriculture and AgriFood Canada, Ottawa, Ontario

<sup>2</sup> Retired

1. Values differing by less than 3 within a column may not represent true differences in yield. Yield Indices are Heritability Adjusted Relative Values (HARV), which favour results from trial locations with high repeatability. For more information, see: Yan, W. Use of HARV in Variety Trial Summaries. 2. See area map on GoCereals.ca website. 3. Cultivar yield ranking may vary from year to year. Decisions are therefore best made using data with the greatest number of years = PBR Status; indicates varieties protected under PBR 91 or PBR 78. Visit pbrfacts.ca to learn more.
